# MAXX3 SLICES THROUGH METAL

Work smarter not harder with the new Flexovit Maxx3 professional ultra-thin cutting discs. Our commitment to improving industrial performance has never been stronger thanks to significant R&D investment, bringing this new blend of proprietary ceramic grain and bond system to life, to deliver excellent cutting results. Flexovit Maxx3's design provides remarkable speed and control from start to finish, slicing through metal effortlessly and using fewer discs for the job.

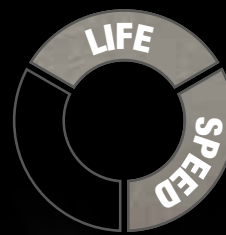

## HOW WILL IT BENEFIT YOU?

- 1 MAXX COMFORT**  
Reduced hand fatigue from less cutting vibration.
- 2 MAXX SPEED**  
More material can be cut in a shorter period of time.
- 3 MAXX DISC LIFE**  
Less downtime and waste... Reduce operating cost and the number of discs you need for the same job.

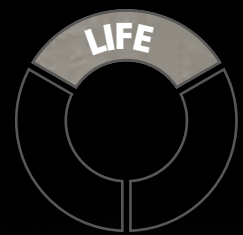

## CUTTING PERFORMANCE COMPARISON

Flexovit Maxx3  
Ceramic Disc

Flexovit  
Zirconia Disc

Flexovit Conventional  
Ceramic Disc

Flexovit Maxx3 is our best in class cut-off disc, available in 1.3mm and 1.6mm thickness. If you want speed of cut and work on thin or hollow materials, the 1.3mm is the one, providing speed, comfort and long life. If you are cutting thicker materials and life of the disc is important, then the 1.6mm is ideal.

**WHATEVER YOUR PICK IS,  
EXPERIENCE THE EXTRA-  
SMOOTH CUTTING ACTION,  
THANKS TO OUR PREMIUM  
CERAMIC GRAIN.**
